

If, Elif, Else (Decision statement)

Syntax

- **if** \<condition>:
- **elif** \<condition>:
- **else**:

```
In [ ]: a = 101

if a > 100:
    print(a,"is bigger then 100")

print("This line Alwas work")
```

101 is bigger then 100
This line Alwas work

```
In [17... a = 10

if a > 100:
    print(a,"is bigger then 100")

else:
    print(a,"is smaller then 100")

print("This line Alwas work")
```

10 is smaller then 100
This line Alwas work

```
In [26... a = 100

if a > 100:
    print(a,"is bigger then 100")

elif a == 100:
    print(a,"is equal to 100")

else:
    print(a,"is smaller then 100")

print("This line Alwas work")
```

100 is equal to 100
This line Alwas work

If ,elif, else rules.

- **if (Only once per code block(Mandatory))**
- **elif(as many time as per code block(optional))**
- **else(Only once per code block(optional))**

```
In [31]: a = 25

if a > 50:
    print("a is bigger")

elif a == 20:
    print("a is 20")

elif a == 30:
    print("a is 30")

elif a == 40:
    print("a is 40")

else:
    print("a is smaller")
```

a is smaller

Nested if & else

```
In [ ]: a = 50

if a > 10:
    print("a is bigger")
    if a > 100:
        print("A IS BIGGEST")

    else:
        print("a is btwn 10 to 99")

elif a < 10:
    print("a is smaller")
    if a < 0:
        print("a is nagative")
    else:
        print("a is btwn 0 to 9")

else:
    print("Code Error")

print("Code over")
```

Code Error

Code over

short hand if & else

```
In [39... a = 1000
b = 500

if a>b: print("a is bigger then b")

else: print("b is bigger then a")
```

a is bigger then b

```
In [43... a = 100
b = 500

print("A is bigger then B") if a>b else print("B is bigger then A")
```

B is bigger then A

```
In [47... # -----
# Game No one
# -----

score = 100
secret_number = 50
guess = int(input("Enter your guess: "))

if guess == secret_number:
    print("Correct!")
    score = score + 20
    print("Your Score:", score)

elif guess > secret_number:
    print("Too High!")
    score = score - 10
    print("Your Score:", score)

else:
    print("Too Low!")
    score = score - 10
    print("Your Score:", score)
```

Too Low!

Your Score: 90

```
In [55... a = int(input("Enter a numer :"))
b = int(input("Enter a numer :"))

if a > b :
    print("A is bigger then b")
elif a == b:
    print("A is equal to B")
elif a<b:
    print("B is bigger then A")
```

A is equal to B

In []: *# Task*

```
a = int(input("Enter a numer :"))  
b = int(input("Enter a numer :"))  
c = int(input("Enter a numer :"))
```
